Infosys Certified Product Owner

Microsoft Certified: Azure Data Fundamentals

# Rishabh Gupta

AI Developer | Specializing in Production AI Applications, Agentic Frameworks & Data Architecture | SQL, Python, AI, AWS

Hyderabad, Telangana, India

## Summary

I am a data professional with a B.Tech in Computer Science, an MBA, and 3.5 years of corporate experience as a BI Consultant. I specialize in bridging the gap between enterprise data architecture and production-grade AI systems. My primary focus is making sure Large Language Models connect securely, accurately, and efficiently to live corporate databases. With a dual background in both backend engineering and business strategy, I bring deep consulting experience in managing data models, relational schemas, and complex business logic for enterprise clients. Instead of just building reports, I focus on building the clean data pipelines, secure semantic layers, and backend cloud infrastructure that modern AI applications need to function reliably. My hands-on technical stack includes Python, Advanced SQL Server, Azure Cloud, Docker containerization, Vector Databases, LangChain, and PowerBI. I am deeply focused on building autonomous agentic frameworks, secure data retrieval systems, and deploying scalable full-stack AI applications smoothly to the cloud.
